Sebastian Gómez

QA Engineer

✉ sebasdgg3001@gmail.com   in Linkedin   🔗 My portfolio

📍 Venezuela, Caracas

Companies need to do more with less. I describe myself as a multidisciplinary QA Engineer who combines DevOps, SRE, and Support. The results are, in general, an environment of confidence within the development team so that, at the end of the day, teams are more confident in the product they are building.

EXPERIENCE

QA Engineer
3MIT 📍 Venezuela 📅 04/2025 - Present

Ensured compliance with national tax regulations by testing finance-heavy Odoo ERP modules.
Designed and maintained a regression suite with broad coverage for financial and accounting workflows.
Adapted QA strategies for large-scale ERP customizations in dynamic client environments.
Built a reusable test framework for critical user flows using Selenium and integrated it in CI/CD pipeline.

QA Engineer
SalmonLabs 📍 United States 📅 07/2025 - 08/2025

Collected, enriched, and verified leads. Built repeatable data pipelines (APIs/scraping → parsing → QC → delivery) and tracked SLAs.
Automated ingestion, transforms, and validations with Python; generated audit-ready reports.
Integrated ChatGPT API to review script outputs, reduce false positives, and accelerate review cycles.Processed large CSV/XLSX datasets: cleaning, deduplication, normalization, and reconciliation.
Used Postman to test endpoints, monitor automated runs, and troubleshoot failures.

QA Engineer
Netforemost 📍 Panama 📅 08/2024 - 04/2025

Built a reusable test framework for critical user flows using Selenium and integrated it into the CI/CD pipeline.
Conducted comprehensive API testing in Postman, detecting issues earlier in the development lifecycle.
Applied TDD practices to improve maintainability and reduce recurring bugs.
Collaborated closely with cross-functional teams and US-based clients, leading demos and communicating findings in Agile/Scrum ceremonies.

Manual QA
Uemura 📍 Spain 📅 01/2024 - 08/2024

Create a testing strategy from scratch for a project where no QA was done before.
Designed extensive test suites and test plans covering functional, usability, UI/UX and regression testing
Improved collaboration between QA, product, and design teams by aligning workflows through Jira and Slack.
Validated business critical functionality by performing basic CMS testing and database (MySQL) testing.
Contributed to reducing project delivery delays by aligning QA processes with Agile methodologies.

CERTIFICATIONS

CS50 and CS50P: **Profesional Certificate for Python Programming** | Harvard University See certificate here

Professional Working Proficiency in English (CEBA Program, VIII Levels Completed) See certificate here

Software **Testing Masterclass** (Udemy) See certificate here

EDUCATION

Instituto Universitario de Nuevas Profesiones
Bachelor of Engineering, Computer Science

📍 Venezuela 📅 2023 - 2026

Completed a comprehensive two-year program in Computer Science, focusing on software development, algorithms, and data structures. Gained a strong foundation in programming languages and software engineering principles.

LANGUAGES

Fluent in Spanish (native)
Professional Working Proficiency in English
